

**ADMISSION RATES BY PROGRAM BETWEEN 2006-2011, AS REPORTED ON PROGRAM WEBSITES**

It is difficult to gain admission into doctoral programs in clinical psychology. Some argue that schools with very "competitive" admissions rates are schools with exceptionally strong reputations and offer outstanding training. Although it is remarkably difficult to determine whether assumption is true, data regarding admissions rates across doctoral programs often does help students make decisions regarding programs to consider. The attached table is based on data provided on APA accredited programs' websites regarding the percentage of students who accepted for admission divided by the total number of applicants between the years 2006-2011

<b>Program Name</b>	<b>Percentage of applicants offered admission among all applicants, past 5 years</b>	<b>Link</b>
